3 Complete the text with the comparative form of the verbs in brackets. (5 points)

In 2014, farmers in northeast China found a fossil of a dinosaur. Soon, a team of scientists heard about this discovery. The Changyuraptor, as the scientists called it, was a new species. It belonged to the family of flying reptiles, but it was ¹ (large) other flying reptiles. It had four wings and its tail feathers were ² (long) the tail feathers of its family members. The scientists think the Changyuraptor was ³ (aggressive) the other flying reptiles. They also think it was ⁴ (dangerous) the others, because it had big teeth and its claws were ⁵ (frightening) the claws on other species. Thanks to this amazing discovery, scientists have now got a better idea about life on Earth millions of years ago.

4 Complete the sentences with a, an, some, any and the. (5 points)

1. Snakes haven't got fur.
2. Our dog is old English sheepdog.
